

Choose the right hose reel from X-innovations **WIND-X® Large and WIND-X® XL**

WIND-X Large and WIND-X XL are professional-grade hose reels designed to provide fast and efficient winding of various types of hoses across a wide range of applications – including fire hoses, irrigation hoses, industrial hoses, evacuation hoses, freshwater hoses, snow cannons, and more.

Both models require a powerful battery-powered drill with a **1/2" chuck and a minimum torque of 65 ft/lb**, equipped with an auxiliary handle for safe and stable operation.

Key Features:

- WIND-X Large and WIND-X XL **accommodate hoses with diameters from 3/4" up to 3"**. Thanks to their lightweight and slim design, they take up minimal space during transport and handling.
- Constructed from **high-strength stainless steel with a cylindrical shape** for maximum durability, these reels leave no marks or damage behind.
- The supplied **PEHD glide plate** features a maintenance-free central bearing and is virtually indestructible.
- The reel consists of three components, including the drill. Tool-free assembly allows for a rapid setup in just seconds.
- Hose retrieval requires only one person and can be completed directly on-site. **Twenty yards of hose can be wound in just 10 seconds with minimal effort.**
- When paired with the Handle-X carry handle, hose management becomes ergonomic and highly efficient.

Model Differences:

WIND-X Large:

- 1/4" spacing between the drive pins (forks), suitable for hoses with wall thickness up to 1/8".
- Handles hoses measuring up to 5 1/2" mm when flattened.

WIND-X XL:

- 1/2" spacing between the drive pins (forks), suitable for hoses with wall thickness up to 1/4".
- Handles hoses measuring up to 6" when flattened.
